Subject: Sunnyside Work Plans for Drilling, Solids sampling and Water Sampling 2 of 2
[Subsurface Invest WorkPlan 07-13-15-Final.pdf](#)

Paula and Brent,

Attached you will find investigative work plans prepared by Sunnyside Gold Corporation as part of Sunnyside's continuing participation in the collaborative effort to improve water quality in the Animas River.

Sunnyside requests that you provide any comments that may improve the work plans at your earliest convenience such that adjustments can be made prior to implementation. The airborne geophysical survey, planned for July 20th, distributed earlier is an attachment to the Subsurface Investigation Work Plan. As a result of a comment by Peter Butler Co-Coordinator of ARSG, Sunnyside will also take water quality samples at A-68 and the Howardsville Gage on the day of the airborne survey to demonstrate the degree of water quality differential at the time of the survey.

Implementation of the attached plans except for the airborne geophysical survey is planned for August and September.

I would appreciate it if you would provide comments to me as soon as practicable.

Thanks,

Pat
